

40 Gal.

60 Gal.

Reliability....

Superior design and construction, combined with innovative features, makes this container stand alone in the market place.

Durability.....

Manufactured in lightweight durable polyethylene to meet or exceed your (and our) stringent quality and performance requirements.

Service....

29 years of technical and field experience assures you that we will be there year after year to service your refuse needs. Almost three decades of experience have contributed to the design and manufacturing of containers that reduce operating cost, benefiting both the user and the collector.

60/90 Royal Series

200 Gal. New Split Lid (6 lbs.)

We give you more container than any other manufacturer.
 Now it's time for you to decide.
The Best Just Got Better!

Innovations:

- Front hatch is easily replaced with other colors to designate refuse, recycling or green waste collection, eliminating excessive container inventory in specific colors.
- Hatch attachment has four "MOLDED-IN" hinge holes designed to add strength to container and minimize damage to hinge area.
- In frost environments, or if gripper is not adjusted properly, four "MOLDED-IN" arm stops help prevent containers from slipping out during dumping cycle.
- Hatch rotates 110° for easier loading, dumping, and independent closing after container is emptied.

Solutions:

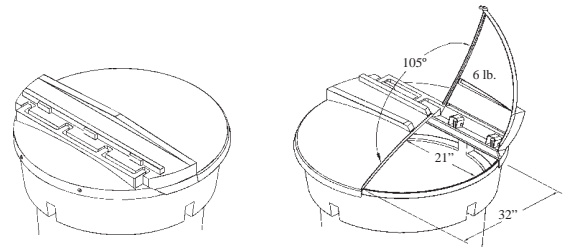

- Easily accessible loading height with lightweight 16 lb. front hatch door opening 70% of container.
- Domed top and sloping overlapped edges help prevent moisture from entering the container and keeps odors inside.
- Bilingual, molded-in, use instructions. (English/Spanish)
- New Split Lid (6 lbs.) for ease in loading. Easily accommodates large bags.

Quality:

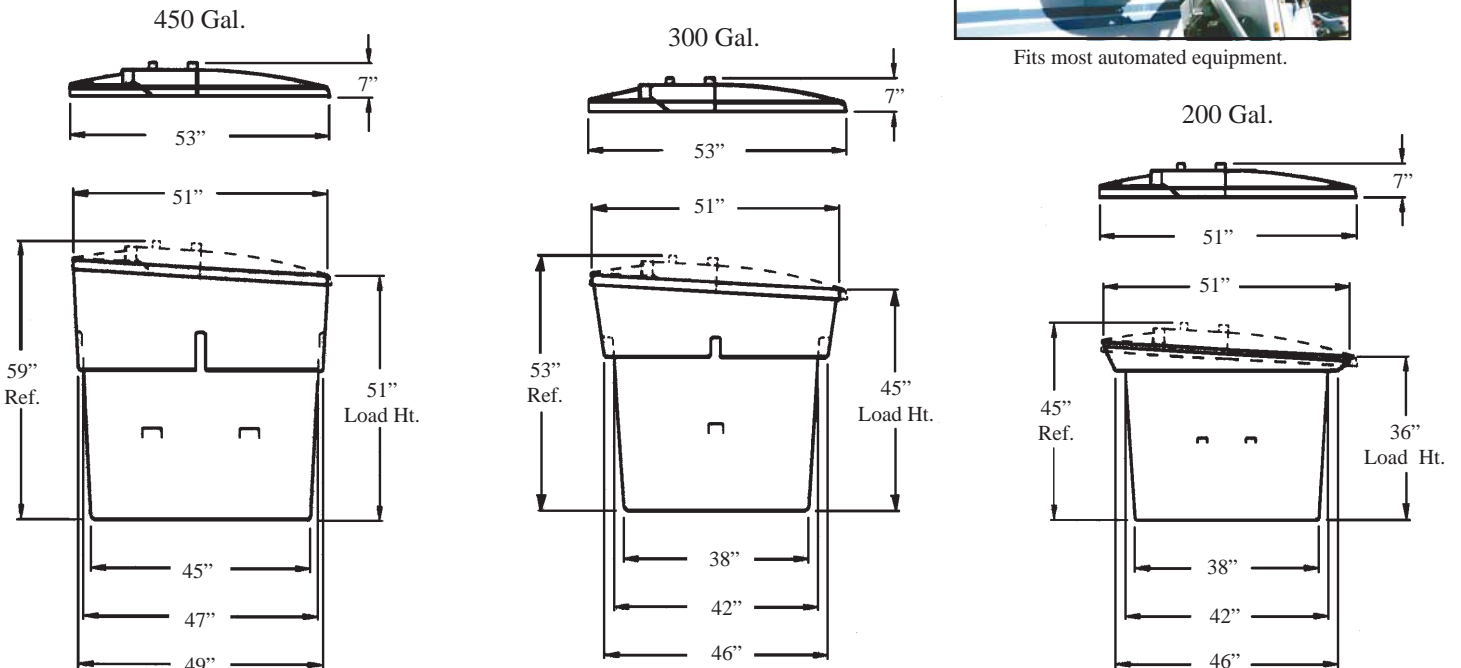

- Re-designed edge at top of container improves strength.
- Area between front hatch and attachment has 16 points of contact to ensure and improve performance and longevity.
- Four large hinge pins manufactured from high-performance material minimize maintenance and reduce damage encountered with PVC.

Service:

- Retrofit: Lid and hatch fits multiple manufacturer's containers.
- Molded in nesting stops ensure ease of unloading from stacks.
- Lightweight design contributes to lighter load weight.

Fits most automated equipment.
